

ASPERELLO

T34 BIOCONTROL

MAKES THE DIFFERENCE

Trichoderma products are a dime a dozen these days, ASPERELLO™ T34 Biocontrol stands out from the crowd.

- ✓ Based on the unique beneficial fungus *Trichoderma asperellum* T34
- ✓ Isolated from *Fusarium* suppressive compost
- ✓ Selected from among several hundred *Trichoderma* strains for efficacy and aggressiveness against diseases
- ✓ Highly concentrated ($\geq 10^9$ CFU/g), therefore active at low dose rate
- ✓ Root protection with Asperello comes at a very attractive price

**ASPERELLO PROTECTS
ORNAMENTAL PLANTS
AGAINST FUSARIUM WILT**

A STITCH IN TIME SAVES NINE

Apply ASPERELLO™ T34 Biocontrol preventatively. Not only will it protect your plants from diseases, often it also stimulates root development in the absence of pathogens.

ASPERELLO™ T34 Biocontrol has multiple modes of action. That's why the product is flexible, efficient in many situations. Furthermore, in contrast to chemical pesticides, resistance development is not a worry.

- ✓ ASPERELLO™ T34 Biocontrol colonizes the roots, forms a barrier against the pathogen and supports healthy root growth
- ✓ ASPERELLO™ T34 Biocontrol triggers plant's natural defense mechanisms
- ✓ ASPERELLO™ T34 Biocontrol parasitizes and actively kills the pathogen

RESULTS SPEAK LOUDER THAN WORDS!

Commercial greenhouse naturally infected with *Fusarium oxysporum* f.sp. dianthi

Efficacy of Asperello against *Fusarium oxysporum* in Begonia

Commercial greenhouse treated with ASPERELLO™ T34 Biocontrol

Efficacy of Asperello against *Fusarium oxysporum* in Cyclamen
